Giving Clients Comfortable, Productive Environments—through a Range of Comprehensive Services.

As one of the Midwest's premier full-service mechanical contractors, Central Mechanical Construction (Central Mechanical) offers a firm foundation in heating, ventilation, air conditioning, plumbing, piping, ductwork, utility, fire and smoke damper, and handyman services.

With 50+ years of experience working on commercial, government, institutional, and industrial projects, Central Mechanical's team of qualified professionals is able to satisfy even the most rigorous quality standards—while still meeting high-pressure deadlines and controlling tight budgets. In addition to expert design-build and design-assist capabilities, Central Mechanical's team can also install a wide range of superior quality heating, ventilation, air conditioning, plumbing, piping, ductwork, and utilities systems. And once they've installed those systems, Central Mechanical's service team is the perfect choice to maintain them, helping to ensure the dependable operation needed for consistently comfortable and productive building environments.

High-Performance Buildings. Demand High-Quality Support.

Central Mechanical's highly trained and highly skilled service technicians have the broad experience and in-depth proficiency required to keep client facilities—including critical systems—operating efficiently at high-performance levels. To do this, Central Mechanical supplies its technicians with leading-edge service tools, maintains an extensive in-house inventory, and utilizes its fully computerized fabrication facility.

Customized Mechanical Services. For Unique Client Facilities.

To help clients select the approach best suited to their requirements, Central Mechanical tailors each service agreement to meet each facility's specific budget needs. Whether clients choose preventive maintenance, as-needed service, turnkey retrofitting, and/or 24/7/365 emergency response, they can be sure Central Mechanical's team will give them the creative solutions and customized care necessary for consistently dependable operation.
